Email: satvikc4344@gmail.com
Mobile: +91 8858516381

SKILLS

Languages: Java, C++, C, Python
Web/ Backend: HTML, CSS, Java Script, React.js, Node.js, Express.js, RESTful APIs
Tools/Platforms: Selenium, AWS, Docker, Kubernetes, MySQL, MongoDB, Azure
Core Concepts: DSA, OOPs, OS, CN, CI/CD
Soft Skills: Problem Solving, Team Player, Adaptability, Quick Learner

PROJECTS

- SyncPulse** | [Real-Time Remote Health Monitoring System](#) Feb' 26 – Mar' 26
- Designed scalable IoT architecture integrating ESP32 sensors with AWS IoT Core and DynamoDB, enabling real-time monitoring through automated data ingestion automation.
 - Developed backend services using Flask and WebSockets to ensure secure & stable software communication while performing system troubleshooting for reliable device-cloud connectivity.
 - Built a cloud-based monitoring platform on AWS EC2 and DynamoDB supporting real-time dashboards and efficient health sensor data analysis within a scalable architecture.
 - Implemented automated IoT data pipelines and optimized backend workflows to improve system automation, enabling continuous health metric data analysis with minimal manual intervention.
- Tech:** ESP32, AWS IoT Core, AWS DynamoDB, Flask, WebSockets, React.js, Chart.js, Boto3, AWS EC2
- StreamCore** | [Video Streaming Backend Service](#) Oct' 25 – Dec' 25
- Architected a modular backend service for a video-streaming platform using Node.js and Express.js, following an MVC-based project structure and scalable routing patterns.
 - Enabled core backend functionalities through RESTful APIs, including video management, user interactions, authentication middleware, and structured request handling.
 - Engineered a maintainable server environment with centralized error handling, reusable middleware, and extensible MongoDB data models to support future feature expansion.
- Tech:** JavaScript, Node.js, Express.js, REST API's, MongoDB, JWT
- OrderSphere** | [Food Order Web App](#) Jan' 26 – Feb' 26
- Built scalable RESTful APIs using Node.js and Express.js, handling authentication, food management, and order processing.
 - Implemented secure JWT-based authentication and Role-Based Access Control (RBAC) for admins, restaurant owners, and customers.
 - Integrated Cloudinary API with Multer middleware for efficient image upload and management, optimizing server performance and storage.
- Tech:** Node.js, Express.js, MongoDB, Git, Bcrypt, JWT, Cloudinary

CERTIFICATES

Computational Theory – Infosys	Jul' 25
AWS Academy Cloud Foundations– AWS	Apr' 25
Bits and Bytes of Computer Networking – Google	Sep' 24
Introduction to Hardware and Operating System – IBM	Sep' 24

ACHIEVEMENTS

LeetCode - Solved 200+ DSA problems across platforms including LeetCode and GeeksforGeeks.	Feb' 25
HackerRank Earned a 5-star rating in C++ by solving competitive programming challenges.	Sep' 25

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 8.70</i>	Phagwara, Punjab Since Aug' 23
Nav Jeevan Mission School <i>Intermediate; Percentage: 83%</i>	Deoria, Uttar Pradesh Apr' 21 – Mar' 22
Nav Jeevan Mission School <i>Matriculation; Percentage: 96%</i>	Deoria, Uttar Pradesh Apr' 19 – Mar' 20
