SUMMARY

Final-year B.Tech CSE student and full-stack developer building production-style systems with React, Node.js, Go, PostgreSQL, MongoDB and Redis; hands-on with Docker, Kubernetes, CI/CD, Prometheus and AI (Gemini, RAG).

SKILLS

Languages: JavaScript, TypeScript, Go, C++, Java, Python, C, SQL
Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.IO), JWT, OAuth
Databases: PostgreSQL, MongoDB, Redis, MySQL, Prisma, Mongoose
Cloud/DevOps: AWS (EC2, S3), Docker, Kubernetes, GitHub Actions (CI/CD), Prometheus, Grafana, Cloudflare
AI & Tools: Gemini API, RAG, Vector Search, Vitest, Playwright, Git, Linux

PROJECTS

- OpsPilot | AI Incident-Response Copilot for Kubernetes | [GitHub](#)** Aug 2026 – Sep 2026
- Architected an AI SRE copilot that turns Alertmanager alerts into incidents, grouped via the service dependency graph, with one timeline of deploys, scaling, config changes and Kubernetes events.
 - Developed a Gemini-powered agent that queries Prometheus, Loki, Tempo and the Kubernetes API via read-only tools; it ranked the correct root cause first in 17 of 19 evaluation runs (~89%).
 - Implemented RAG over runbooks and past incidents (MongoDB Atlas Vector Search) and human-approved remediation under least-privilege RBAC, with metric verification and a hash-chained audit log.
- Tech:** Node.js, React, MongoDB Atlas, Kubernetes, Prometheus, Loki, Tempo, OpenTelemetry, Gemini API
- CanaryShield | Progressive Delivery & Feature-Flag Platform | [GitHub](#)** Sep 2026
- Built a Go platform API for feature flags and staged canary rollouts (5% to 100%) with deterministic SHA-256 user bucketing, attribute-based targeting, per-user overrides and an instant kill switch.
 - Automated rollbacks via a guardian that polls Prometheus every 5 s, compares canary vs. baseline error rates and reverts breaching releases; used Redis (caching, pub/sub, HyperLogLog) and Server-Sent Events.
- Tech:** Go, PostgreSQL, Redis, Prometheus, Docker Compose, React, TypeScript
- KSPDB | Fault Localization Engine | [GitHub](#)** Jul 2026 – Aug 2026
- Designed a real-time fault localization engine for a 4,000+ pole power distribution network, detecting SPAN, RANGE, DT and FEEDER faults from pole-level IoT telemetry on a live Leaflet map.
 - Engineered crash-safe, Dockerized ingestion workers using PostgreSQL FOR UPDATE SKIP LOCKED, with idempotent processing, deduplication, out-of-order handling and automatic restoration verification.
 - Inferred missing grid topology (~60% of transformers) via an MST-based algorithm, alongside real-time incident/ticket workflows, a fault-injection simulator, outage correlation and 270+ Vitest tests.
- Tech:** React, JavaScript, Node.js, PostgreSQL, Prisma, Docker, Leaflet, Zod, Vitest, Railway
- Library Nest | Social Reading Platform (MERN) | [GitHub](#)** Mar 2026 – Apr 2026
- Launched a full-stack MERN reading platform on AWS (EC2, S3, CloudFront) with progress tracking, analytics via MongoDB aggregation pipelines, real-time activity feeds and 1:1 chat using Socket.IO.
 - Hardened authentication with Argon2id hashing, rotating refresh tokens, RBAC and Zod validation; integrated Razorpay subscriptions with signature-verified, idempotent webhooks.
 - Shipped Gemini-powered reading insights and RAG-based diary Q&A, backed by GitHub Actions CI/CD, Docker, and Vitest, Supertest and Playwright tests.
- Tech:** MongoDB, Express.js, React, Node.js, AWS, Socket.IO, Razorpay, Gemini API, Docker, GitHub Actions

CERTIFICATIONS

- Computational Theory – [Infosys](#) Jul 2025
AWS Academy Cloud Foundations – [AWS](#) Apr 2025
The Bits and Bytes of Computer Networking – [Google](#) Sep 2024
Introduction to Hardware and Operating Systems – [IBM](#) Sep 2024

ACHIEVEMENTS

- LeetCode:** Solved 250+ DSA problems across LeetCode and GeeksforGeeks. Feb 2026
Runner-Up, Code-Off Duty Hackathon (competitive coding event). Apr 2025
HackerRank: Earned a 5-star (Gold) rating in C++ by solving competitive programming challenges. Sep 2025

EDUCATION

- Lovely Professional University** Phagwara, Punjab
Bachelor of Technology – Computer Science and Engineering; **CGPA: 8.61** Aug 2023 – May 2027 (Expected)
- Nav Jeevan Mission School** Deoria, Uttar Pradesh
Intermediate (Class XII); **Percentage: 83%** Apr 2021 – Mar 2022
- Nav Jeevan Mission School** Deoria, Uttar Pradesh
Matriculation (Class X); **Percentage: 96%** Apr 2019 – Mar 2020
